

Conservation Contracts has experience over many years in the control and eradication of numerous alien/invasive plants established in Britain. Some of these species cause major problems with their impact on habitats by displacing native species and their resistance to control. CCNW can provide a cost effective comprehensive management plan for the control of invasive/alien plant species.

Management Plans Surveys Control Japanese Knotweed Giant Hogweed Aquatic Flora

Conservation Contracts have a fully equipped team carrying out survey work including plant identification, mapping out and managing the control of invasive species, such as Japanese Knotweed, Giant Hogweed, Himalayan balsam, Bracken, Rhododendron, Ragwort & a variety of aquatic invasive flora.

All our solutions adhere to Environment Agency guidelines.
